KARBALA PROVINCIAL COURTHOUSE PROJECT

ABOUT PROJECT

The Karbala Judiciary Complex is a government project with a land area of 50,000 SQ meters and a built-up area of 30,000 square meters. The complex consists of three main buildings: the criminal civil and presidency section

The complex includes various spaces, such as administrative offices, courtrooms for crimes with penalties of more than 5 years and less than 5 years, conference and meeting halls, and many other areas. Mirath Architectural Studio was responsible for the interior design of this project, considering the overall concept and harmony with the building's exterior facade. The design was executed while maintaining the simplicity and administrative identity of the space.

KARBALA AMPHITHEATER PROJECT

ABOUT PROJECT

The Karbala Amphitheater project is one of Miras Studio's most appealing projects, designed with an area of 800 SQ meters. The design and concept for this project have a special focus on the identity and culture of Arabic architecture incorporating symbols favored by Arab culture such as the use of red velvet and Islamic _ arabic arches.

ISTANBUL COMMERCIAL PROJECT

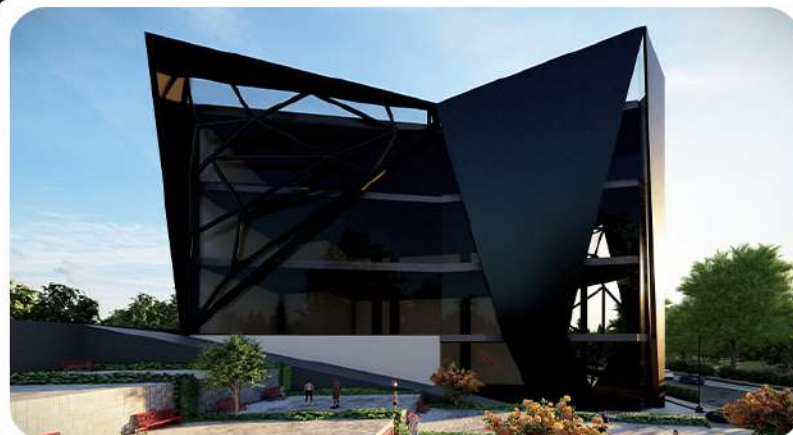

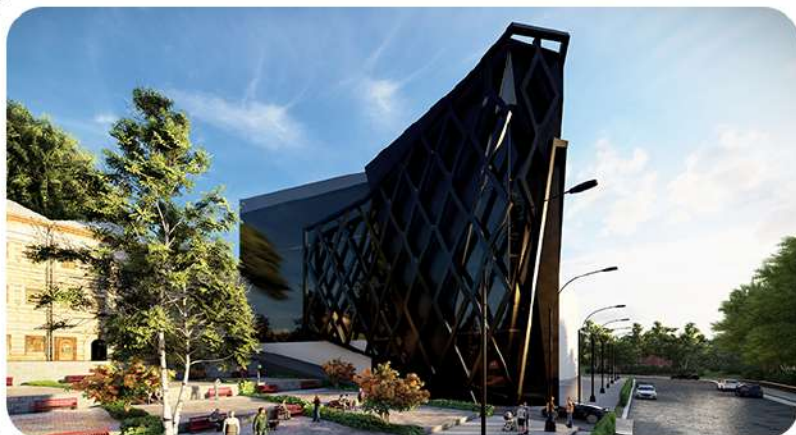

ABOUT PROJECT

A commercial project in Istanbul involved the design of the facade and floor plan for a commercial complex in the industrial area Istanbul. The complex was designed and constructed for the purpose of selling automotive spare parts. The project was situated on a 6600 SQ meter land featuring a 6-story building with a total area of 6,600 square meters. The client requested a facade that was in harmony with the product's nature and the area's characteristics, using a dark color scheme and theme while also being easy to implement. The main challenges of the project included the specific topography of the land, with a height difference of about one and a half stories across two different fronts, and the interaction with a non-Iranian client. Miras Architecture Studio successfully gained the client's full satisfaction by providing a variety of alternatives.

HOTEL HAYAT LOBBY PROJECT

ABOUT PROJECT

The renovation project for the Hyatt Hotel lobby, carried out by Miras Architectural Studio, aimed to optimize the space and provide the necessary office sections for key hotel managers. In this plan, only one of the existing lobbies was kept as the main lobby, while the other sections were allocated for administrative use. The area of the existing lobbies was approximately 350 square meters, which was reduced to 180 square meters in the new design

ONSORI DAIRY PROJECT

ABOUT PROJECT

The onsori Dairy project was designed to create a warm, inviting, and functional retail environment. The concept combines natural wood finishes with illuminated glass blocks, striking a balance between tradition and modernity. The layout highlights the variety of dairy products, ensuring both visibility and accessibility for customers. Thoughtful lighting and material choices enhance the freshness and quality of the products while establishing a distinctive brand identity that reflects authenticity and trust.

TIRA HOME PROJECT

ABOUT PROJECT

Ice Cafe Project is a compact 40-SQ-meter space designed with a unique concept. The main idea is inspired by ice and the cafes name, aiming to evoke a sense of cold and winter for the visitors. To create this experience, special and transparent materials in a blue and white color palette were used, resulting in a bright, cool, and captivating atmosphere. The design and execution supervision were carried out by Miras Architectural Studio .
